

ECO FALCON
Eco Solutions for a Global Market

Eco Falcon – Eco Solutions for a Global Market

Falcon Global Solutions LLP is a sustainability-driven B2B packaging solutions startup focused on replacing single-use plastics with biodegradable alternatives. The company provides end-to-end packaging solutions, including sourcing, custom branding, supply chain management, and export logistics.

Operating on a Packaging-as-a-Service (PaaS) model, Falcon Global Solutions LLP enables retailers, hospitals, corporates, and emerging brands to transition to eco-friendly packaging through a scalable and cost-efficient system.

The startup is currently supplying biodegradable garbage bags to hospitals, schools, and tech parks across India, and is also supporting small-scale food businesses from rural and Tier 3 regions by providing premium packaging and labeling solutions, enabling them to scale and access international markets such as the GCC.

Falcon Global Solutions LLP is actively expanding across India and international markets, including the Middle East and Africa.

This dual approach large-scale institutional transition and grassroots business enablement positions **Falcon Global Solutions LLP** as a sustainable packaging ecosystem enabler rather than a traditional supplier.

How does the startup generate revenue?

- Bulk B2B product sales
- Private labeling and customization charges
- Long-term supply contracts
- Subscription-based packaging supply (planned)

Falcon Global Solutions LLP is building India's sustainable packaging transition infrastructure, enabling both large institutions and grassroots businesses to adopt biodegradable solutions and scale globally.

An underwater photograph showing a large, clear plastic bag floating in the water. To the left, a green and silver metal can is partially visible. The water is blue and contains various pieces of debris, including small pieces of plastic and organic matter. The lighting is bright, suggesting a shallow depth.

**Used for minutes.
Pollutes for
centuries.**

5 Trillion+

Plastic bags used annually.

8 Million Tons

Tons entering oceans yearly.

<10%

Plastic ever recycled.

By 2050: more plastic than fish in oceans by weight

Why Distributors Choose Eco Falcon
